Foster Care
Technologies

What's New

- Completed upgrade for legacy client.
- Updated the verbiage and timeout of success/error messaging for a cleaner user experience.
- Continued with setup for additional legacy client.
- Working on performance improvements to increase efficiency.
- Added messaging that informs the user that they must address any active providers when trying to deactivate an agency.
- Added additional Level of Care (AWOL) for Texas providers.
- Made updates to ensure that assigned IDs stay consistent as different placements are made for a client.

Bugs

- Addressed the following issues:
    - Level of Care times were not aligned with placement start times.
    - Getting errors when trying to edit multiple LOCs
    - Permissions for reviewing family app user registrations needed to be updated.
